Platinum

Brushes

no. 1 wash
no. 6 flat
no. 2 round
no. 10/0 liner
scruffy brush
large mop

Misc.

Transparent tracing paper,
graphite paper, stylus, palette,
water bowl and paper towels.

Preparation

Basecoat Box

Basecoat the top of lid Chambray Blue and base White on the lid edges. Basecoat box bottom Opaque Red or Cape Cod Blue.

Transfer Design

Transfer main pattern lines using graphite paper and a stylus. Trace pattern details on after the areas are basecoated and dry.

Basecoat Car

Car body is Opaque Red, seat is Opaque Yellow, tires and back two sections of muffler are Black, the edge of rims, roll bar and front section of muffler are Platinum and the spoke area of the rims and grill are a wash of Black.

Instructions

Refer to photo for detail and color placement.

Body of Car

Define car details with thinned Black Cherry using a liner brush.

Use a flat to shade the top edge of the car, along the back, under the muffler and behind each vent with a float of Black Cherry. Shade the car seat with Opaque Yellow + Black 1:1. Use this same mix to add lines and buttons to upholstery.

Highlight the car body, tops of vents and mirrors with Tangerine; refer to photo. This highlight can either be a flip float or dry-brushed with a scruffy

brush. Reinforce highlight with a brush mix of Tangerine + Opaque Yellow 1:1. If the highlight gets too yellow simply wash over it with Opaque Red.

Muffler

Highlight the black area with a dry brush of Black + Chambray Blue 1:1, reinforce highlight by adding more Chambray Blue to the dirty brush.

Shade both ends of the Platinum portion of the pipe and also the outlet with a float of Black. This can be choppy and irregular as it supposed to be an old race car.

Tires and Grill

Highlight with a flip-float of Black + Chambray Blue 1:1 along the line between the tire sidewall and the tread, and where the tire turns to meet the rim. Refer to photo. Reinforce the highlight on the sidewall and by the rim by adding more Chambray Blue to the dirty brush.

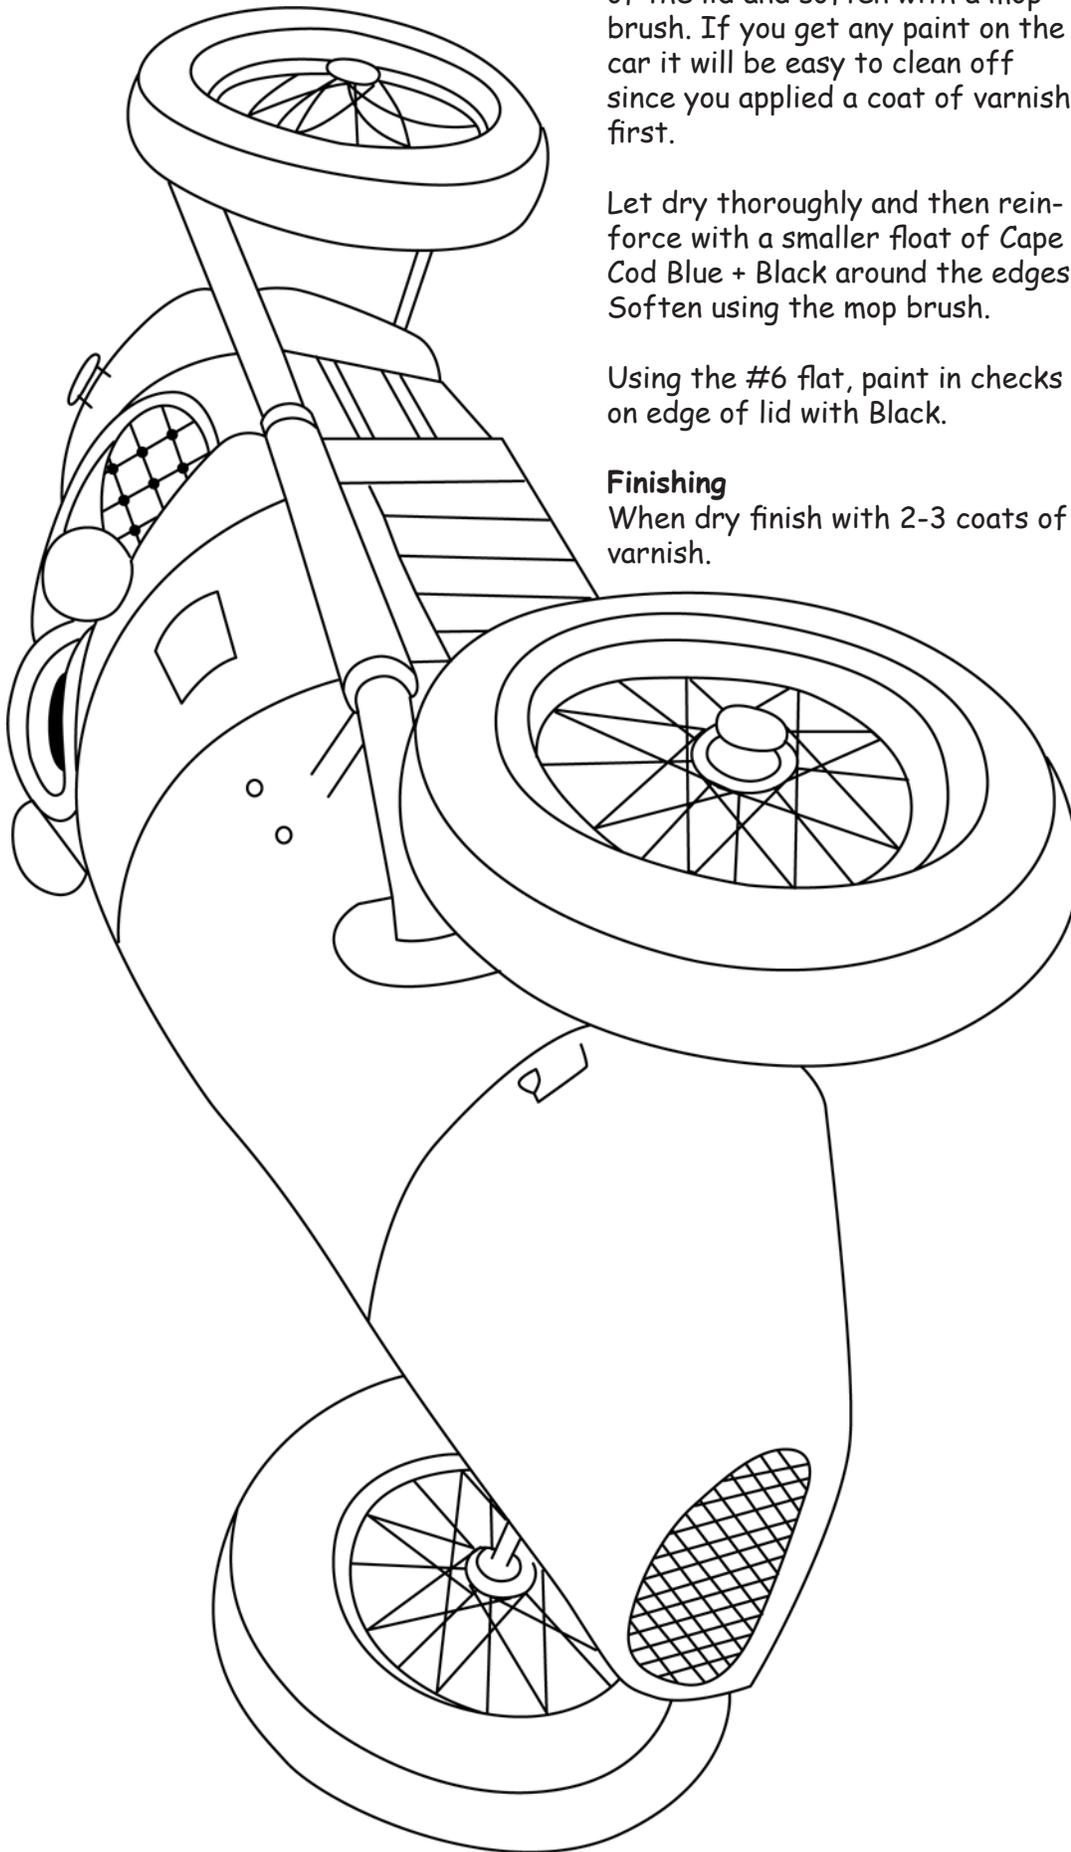

Paint the hubcap Platinum. Add thin lines for spokes and grill with Platinum.

Define hubcaps and add detail to rims with a soft line of thinned Black. Refer to photo.

Final details

Add final details on car with Platinum.

Apply one coat of varnish to the top of the lid. Then use the 1" wash to brush in a wide float of

Cape Cod Blue around the top of the lid and soften with a mop brush. If you get any paint on the car it will be easy to clean off since you applied a coat of varnish first.

Let dry thoroughly and then reinforce with a smaller float of Cape Cod Blue + Black around the edges. Soften using the mop brush.

Using the #6 flat, paint in checks on edge of lid with Black.

Finishing

When dry finish with 2-3 coats of varnish.
