

Surface Ideas for Christmas 2023

Unfortunately, we were unable to find the exact surface. The design measures approximately 8" x 28". As it says in the pattern, if you want to use it full size on a bucket, the bucket should be around 9" in diameter and have smooth sides (no ridges). This is about a 3-gallon bucket.

Della's has the following which might work, but you will have to adjust your pattern.

The last one looks round but is Oval in shape. No idea the diameter or circumference.

Amazon has the next ones, which are slightly larger than the pattern but no lid; however, they are very sturdy buckets with smooth sides.

This one might work, but if you look closely there are ridges at the top and bottom. You might have to shrink your design.
